

Social Decision-Making Tasks (Supplementary tasks)

This file shows each screen that a participant may see on Qualtrics;
The choices in these tasks are not from a real participant and are
only for demonstration purposes.

Tasks in this session

- Game 1: Social value orientation task
- Game 2: Prisoner's dilemma game
- Game 3: Risk preference task (positive domain)
- Game 4: Risky dictator game
- Game 5: Trust game (with no history)
- Game 6: Trust game (with history)
- Game 7: Ultimatum game (as proposer) or
Ultimatum game (as responder)
- Game 8: Risk preference task (negative domain)
- Game 9: Temporal discounting task

Part 2: Decision-Making Tasks

- In this section, you have the opportunity to get extra points that will be translated to extra money!
- You will play some games. Each game has multiple rounds. You have the chance to earn points at every round.
- The total number of points you can gain in these games (excluding practice rounds) ranges from approximately 180 to 1100 points. The more points you gain, the better! A subset of your choices will be randomly selected to determine your payment in dollars. We will inform you about this at the end of the study.
- Complete as many games as you can! Generally, there are no right or wrong answers for these games. But there are answers that might end up giving more points. Think carefully while you play each game.
- You are encouraged to complete each game without taking a break. However, if you do need to take a break, please feel free to do so in between games.

- In some of the games, you will play with several players. We refer to the player you will be playing with as “Player B”.

You

Player B

- A different participant will play as “Player B” for each round.
- “Players B” could be any adult participating in this study or other similar studies. “Players B” may not be playing at the same time as you, in which case we use their pre-recorded choices. You will not know who “Player B” is; and “Player B” will also not know who you are.
- All participants receive the same instructions for each game.

Game 1 Instructions

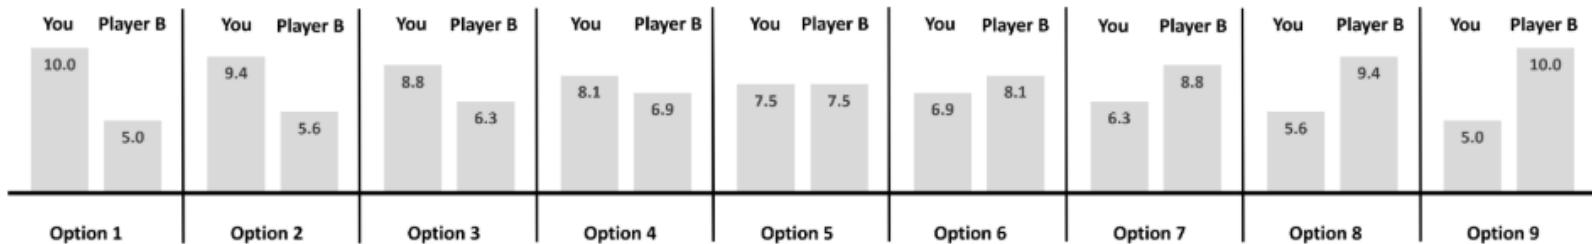

In this game, you are randomly paired with one other person. We refer to this player as “Player B” throughout the game. This player is someone you do not know and will not knowingly meet in the future.

You will be making choices by selecting between 9 options. Your own choices will produce points for both yourself and Player B. The more points you get, the better for you; the more points Player B receives, the better it is for them.

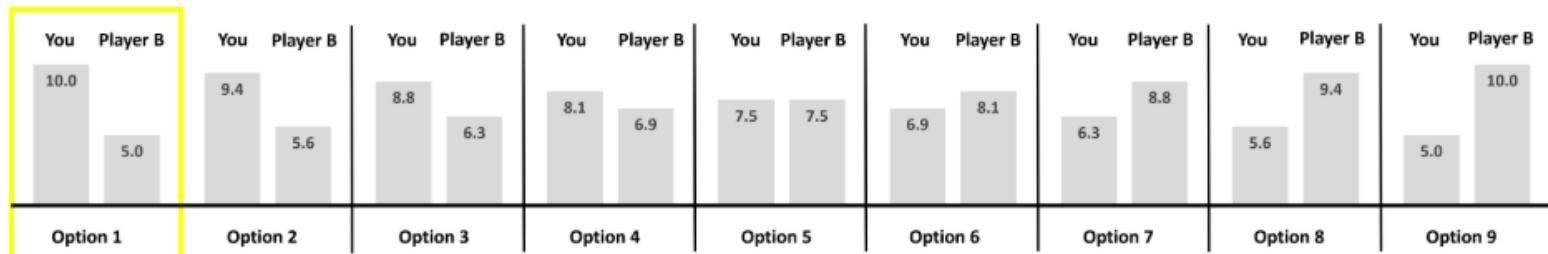

There are no right or wrong answers—choose the option that you, for whatever reason, prefer most.

A typical question is the following, and you will select between 9 options:

If you select **Option 1**,

You will get **10.0 points**.

Player B will get **5.0 points**.

If you select **Option 6**,

You will get **6.9 points**.

Player B will get **8.1 points**.

Please note that:

- You can choose one of the nine options.
- There are no right or wrong answers. Please choose the option that you prefer most.
- Decisions made by you will produce points for you and Player B.
- You have **1 minute** for each round.

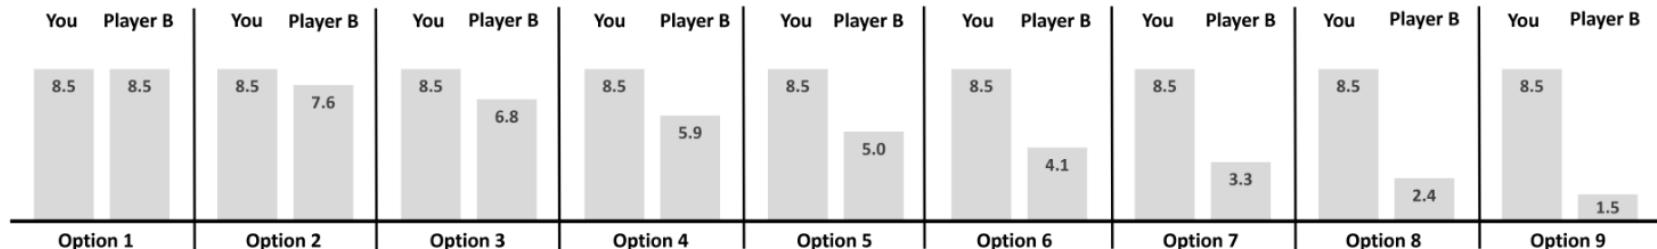

If you are ready to start the game, click on the next button (→) to begin the formal rounds.

You are encouraged to complete the formal rounds without taking a break.

Game 2 Instructions

This game consists of 4 quizzes, 1 practice round and 10 formal rounds.

In each formal round, a different participant will be in the role of "Player B".

There is no face-to-face communication; you will never know or meet the person you play with; similarly, Player B will never meet you or know who you are.

You

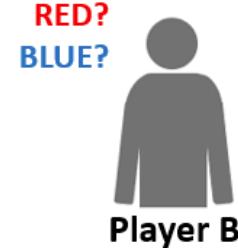

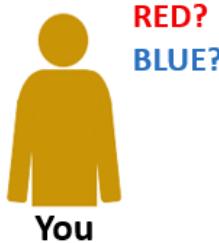

Player B

In each round, you will be asked to choose either **RED** or **BLUE**.
At the same time, Player B will also choose between **RED** and **BLUE**.

You will have **one minute** to make the decision.

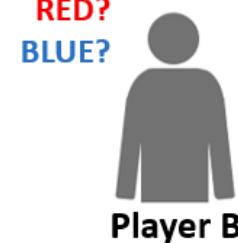

Your choice and Player B's choice will determine the number of points each of you will receive for each round.
We will explain the rules in the next few pages.

You get: X points

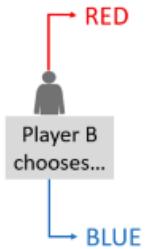

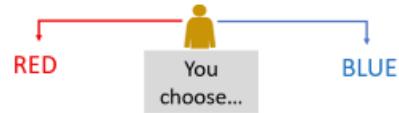

Player B gets: Y points

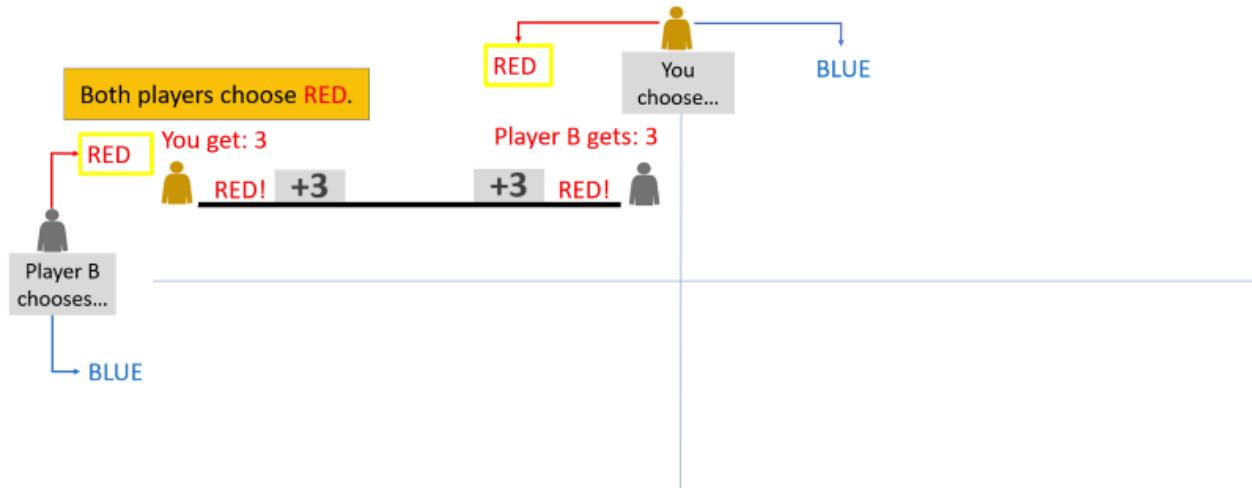

You will choose between RED and BLUE.

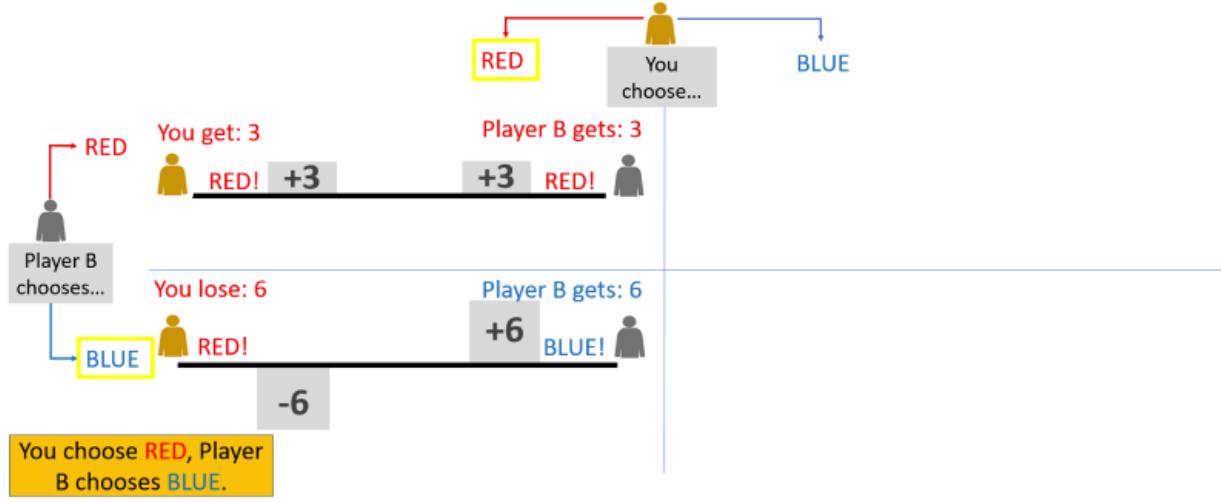

At the same time, Player B will also choose between **RED** and **BLUE**.

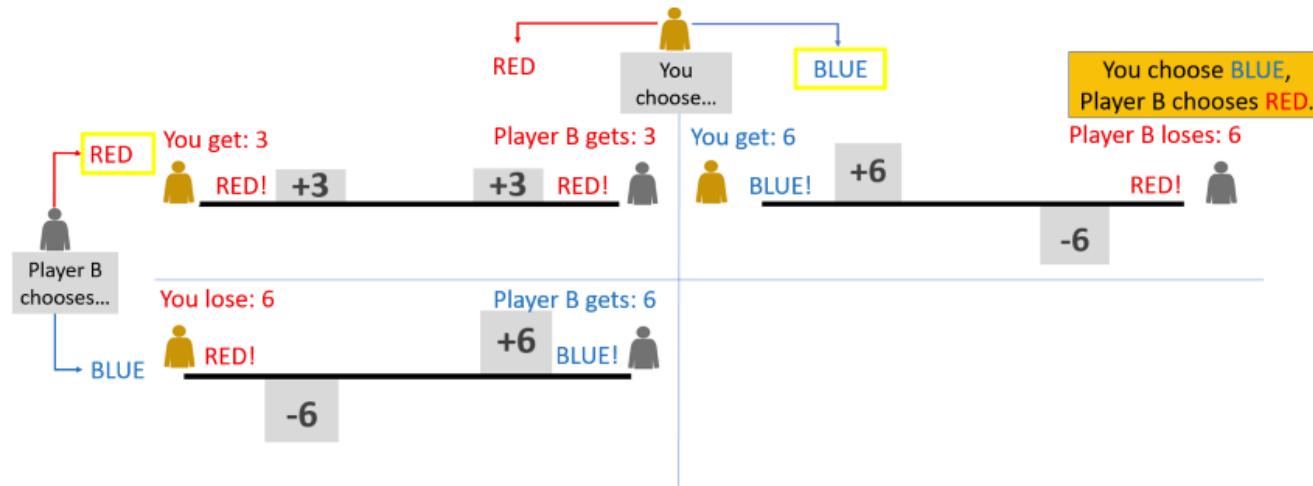

If you choose **RED** and Player B chooses **RED**,
then you get 3 points [+3] and Player B gets 3 points [+3].

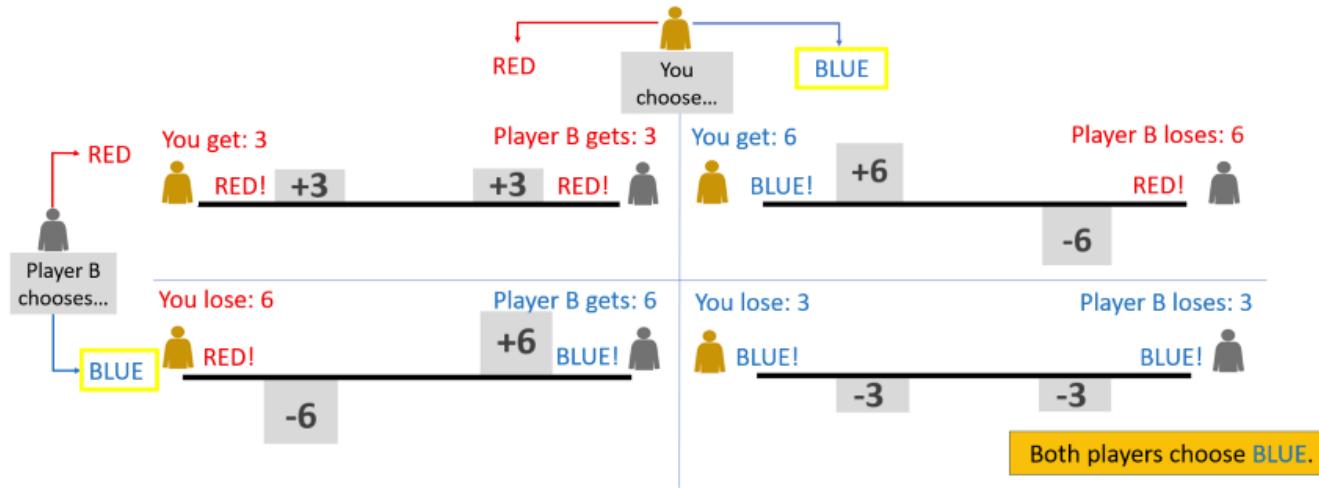

If you choose **RED** and Player B chooses **BLUE**,
then you lose 6 points [-6] and Player B gets 6 points [+6].

If you choose **BLUE** and Player B chooses **RED**,
then you get 6 points [+6] and Player B loses 6 points [-6].

If you choose **BLUE** and Player B chooses **BLUE**,
then you lose 3 points [-3] and Player B loses 3 points [-3].

The more points you get, the better for you.

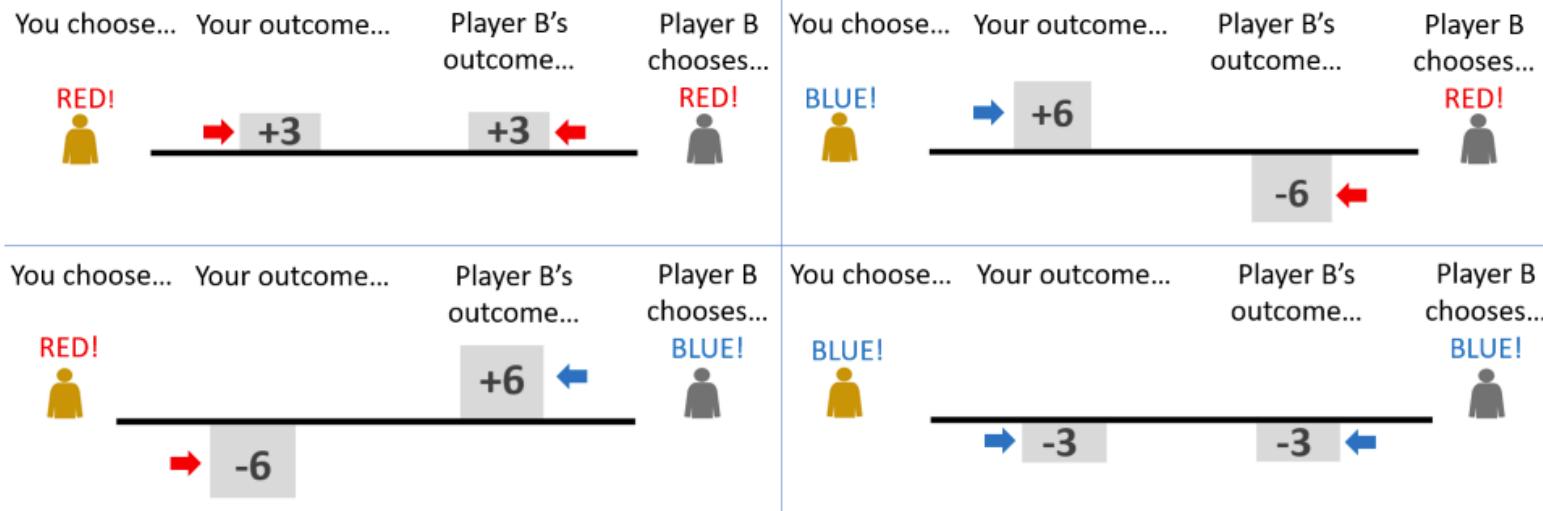

Similarly, the more points Player B gets, the better for Player B.

Both you and Player B know these rules.

Your payoffs can be summarized in the matrix below, which will be shown throughout this game.

You do not need to memorize the outcomes.

Please note that:

- You will play several rounds with different participants. In each round, you will choose either **RED** or **BLUE**. Player B will also choose **RED** or **BLUE**.
- You will **not** know the choice made by Player B **before** you make a decision. Similarly, Player B will also **not** know your choice **before** Player B makes a decision.
- Your choice and Player B's choice will determine the number of points each of you will receive for each round.
- Both you and Player B know these rules.
- Your responses are anonymous. You will never know or meet the person you play with; similarly, the person you play with will never meet you or know who you are.
- The experimenter will also not know your responses, as they will be anonymised.
- You have **one minute** to complete each round.

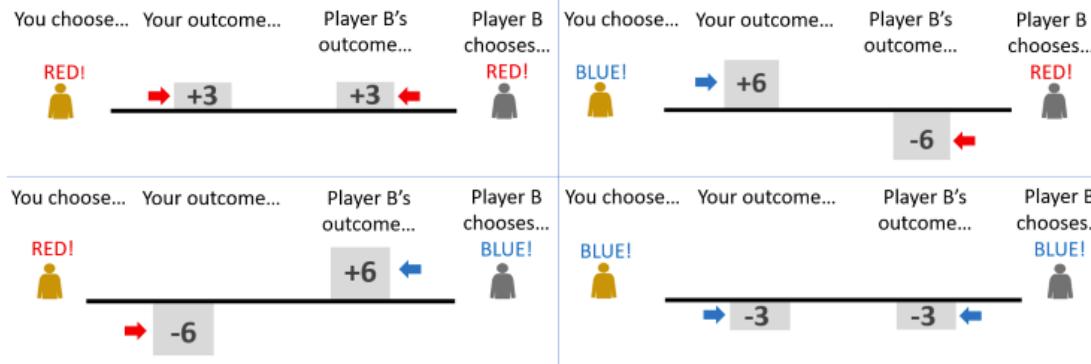

Let's make sure you understand the rules.

If you are ready to start the game, click on the next button (→) to begin the quizzes and practice round.

Quiz 1 out of 4

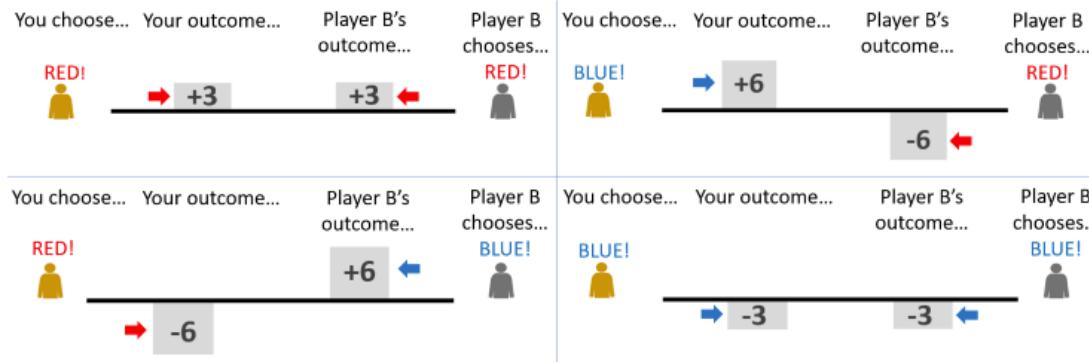

If you choose **RED** and Player B chooses **RED**,
how many points will you and Player B get?

		Points			
		+3	-6	+6	-3
You		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Player B		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Quiz 1 out of 4

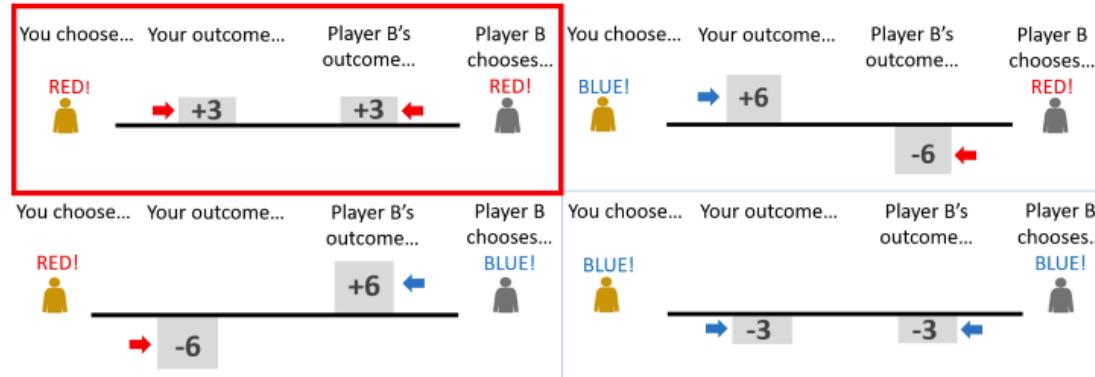

If you choose **RED** and Player B chooses **RED**,
how many points will you and Player B get?

		Points			
		+3	-6	+6	-3
You					
	Player B				

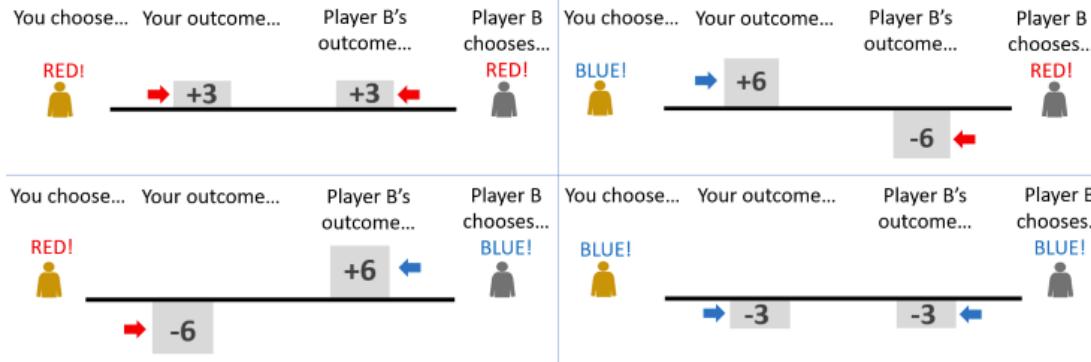

Correct Answer:

If you choose **RED** and Player B chooses **RED**,
you get 3 points [+3] and Player B gets 3 points [+3].

Quiz 2 out of 4

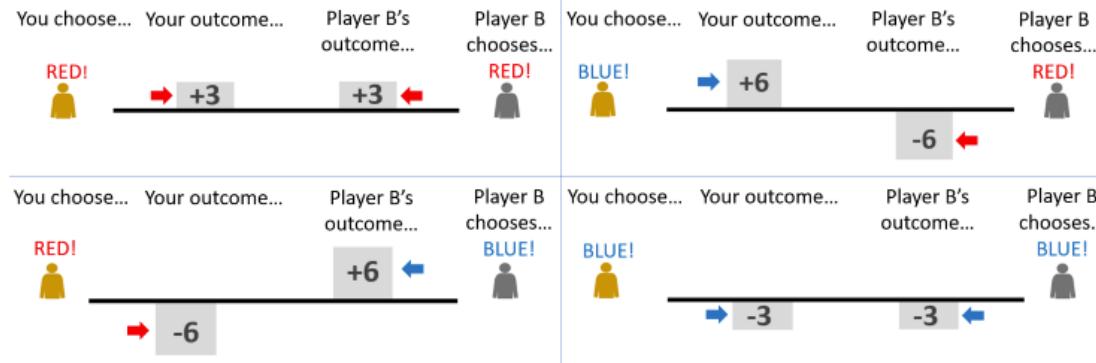

If you choose **RED** and Player B chooses **BLUE**,
how many points will you and Player B get?

		Points			
		+3	-6	+6	-3
You		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Player B		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Quiz 2 out of 4

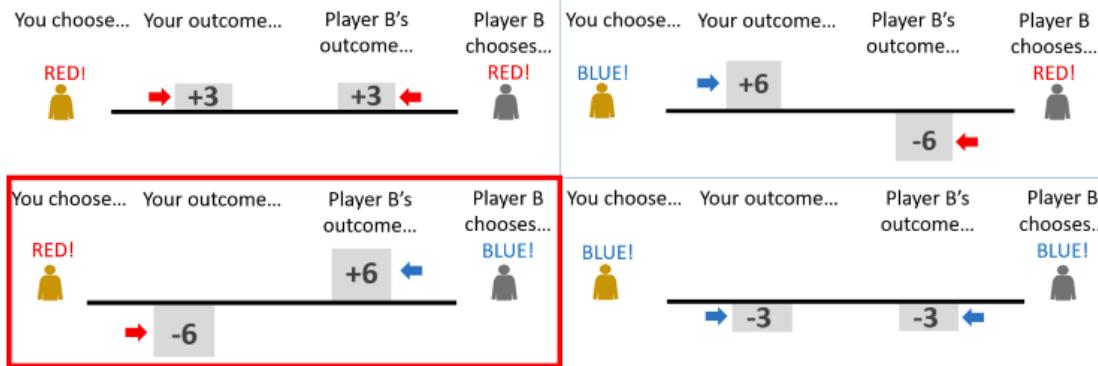

If you choose **RED** and Player B chooses **BLUE**,
how many points will you and Player B get?

		Points			
		+3	-6	+6	-3
You		<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
	Player B	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

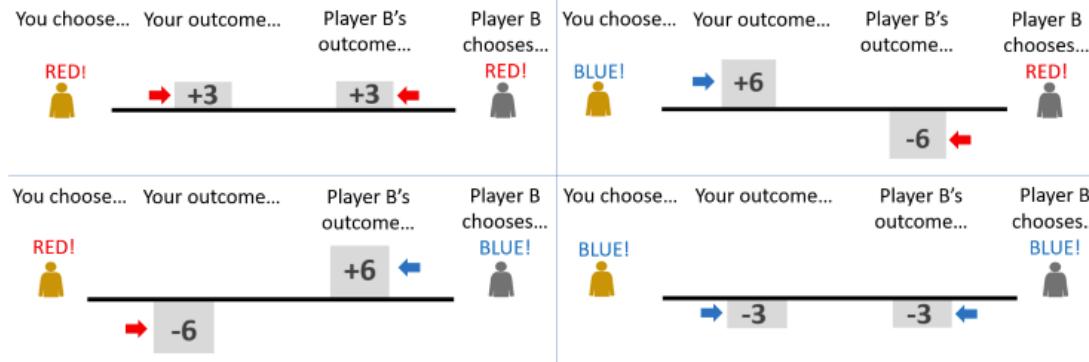

Correct Answer:

If you choose **RED** and Player B chooses **BLUE**,
you lose 6 points [-6] and Player B gets 6 points [+6].

Quiz 3 out of 4

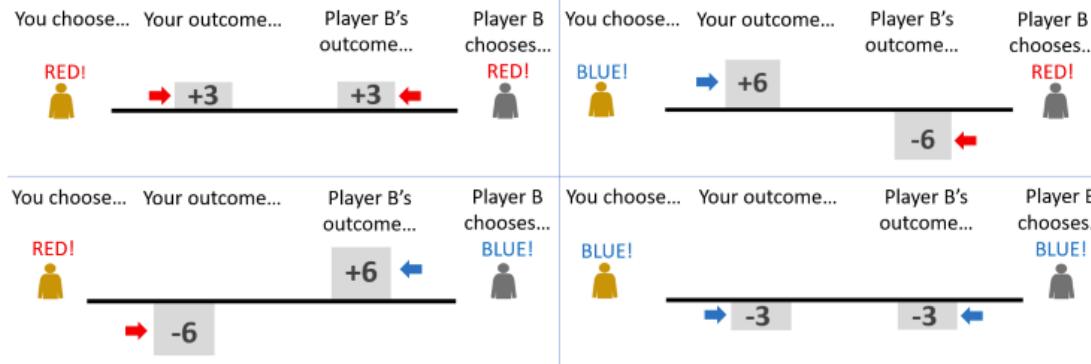

If you choose **BLUE** and Player B chooses **RED**,
how many points will you and Player B get?

		Points			
		+3	-6	+6	-3
You		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Player B					

Quiz 3 out of 4

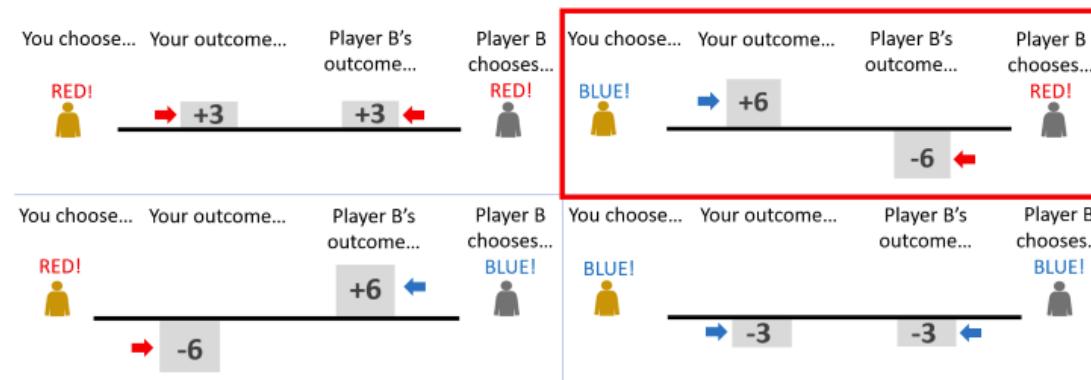

If you choose **BLUE** and Player B chooses **RED**,
how many points will you and Player B get?

		Points			
		+3	-6	+6	-3
You					
					
Player B					

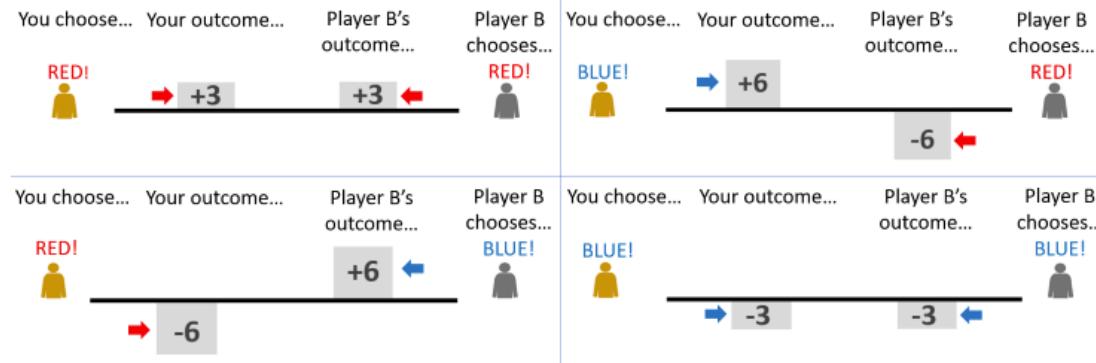

Correct Answer:

If you choose **BLUE**, and Player B chooses **RED**,
you get 6 points [+6] and Player B loses 6 points [-6].

Quiz 4 out of 4

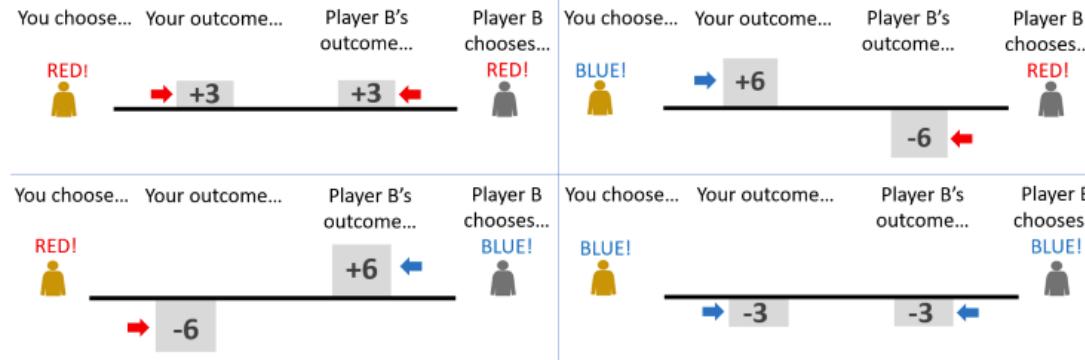

If you choose **BLUE** and Player B chooses **BLUE**,
how many points will you and Player B get?

		Points			
		+3	-6	+6	-3
You		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Player B		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Quiz 4 out of 4

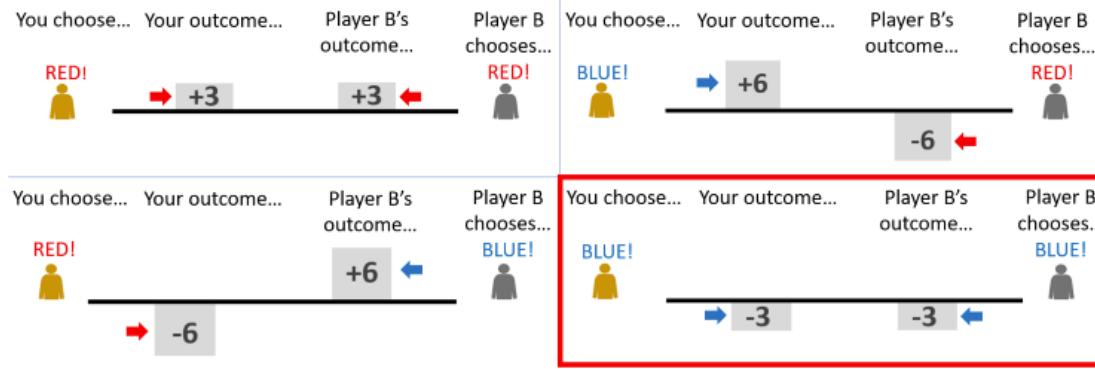

If you choose **BLUE** and Player B chooses **BLUE**,
how many points will you and Player B get?

		Points			
		+3	-6	+6	-3
		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
You		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Player B		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

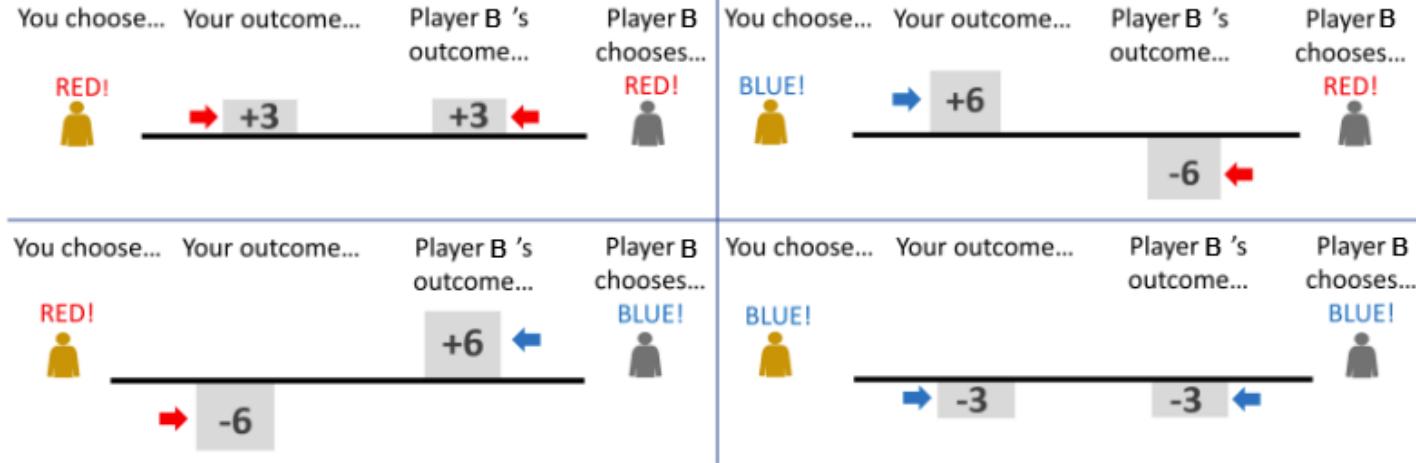

Correct Answer:

If you choose **BLUE** and Player B chooses **BLUE**,
you lose 3 points [-3] and Player B loses 3 points [-3].

Game 3 Instructions

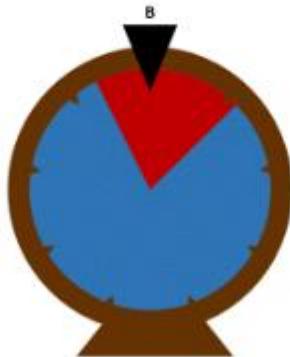

In this game, you will make a series of choices to spin Wheel A or Wheel B. Each wheel has 10 equal segments. The black triangle pointer will randomly land on one of the segments. Segments of different colours are worth different points. Wheel A contains only grey segments. Choosing to spin this wheel always results in a gain of 10 points.

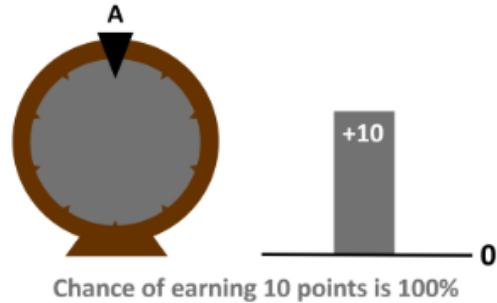

Wheel B contains a mix of red and blue segments (it could also be all red or all blue). The pointer landing on a red segment results in a gain of 15 points while the pointer landing on a blue segment results in a gain of 5 points.

After a wheel is chosen, it will be spun, and the pointer will randomly land on one of the segments.

If you choose Wheel A, your chance of earning 10 points is 100%.

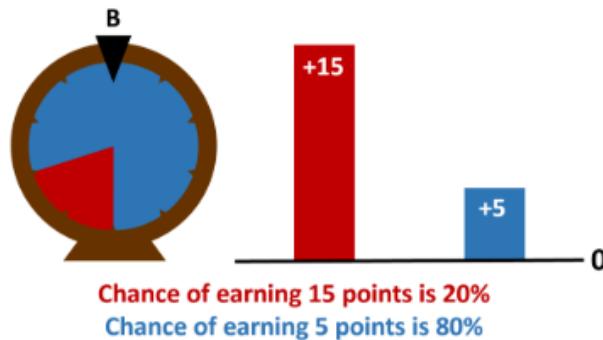

If you choose Wheel B, the outcome could be higher or lower than 10 points, as it depends on where the pointer lands.

In this example, Wheel B has **2 red segments** and **8 blue segments**.

Thus, if you choose Wheel B, there is a:

- 20% (2/10) chance of earning 15 points (pointer landing on a red segment), and
- 80% (8/10) chance of earning 5 points (pointer landing on a blue segment)

Note that the ratio of blue and red segments changes in each round.

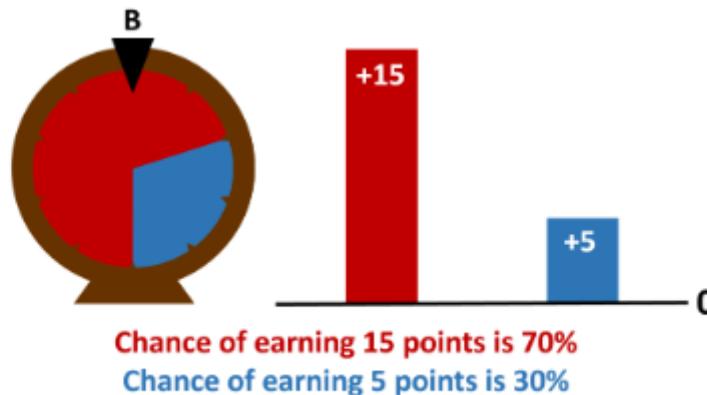

Pay attention! The proportion of red and blue segments in Wheel B will change in each round of this game.

In this example, Wheel B has **7 red segments** and **3 blue segments**.

Thus, if you choose Wheel B, there is a:

- 70% ($7/10$) chance of earning 15 points (pointer landing on a red segment), and
- 30% ($3/10$) chance of earning 5 points (pointer landing on a blue segment)

Please note that:

- You can choose to spin either Wheel A or Wheel B.
- Each wheel has 10 equal segments.
- Wheel A contains only grey segments while Wheel B contains red and blue segments (but could also only consist of all red or blue segments).
- Once you choose a wheel, it will be spun, and where the pointer lands determines how many points you win.
- The pointer landing on a grey segment results in a gain of 10 points, a red segment results in a gain of 15 points, and a blue segment results in a gain of 5 points.

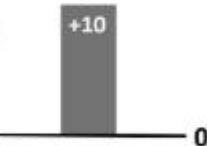

Let's make sure you understand the rules.

If you are ready to start the game, click on the next button (→) to begin the practice rounds.

Practice round 1 out of 2

Please choose Wheel A or Wheel B.

Chance of earning 10 points is 100%

Select Wheel A

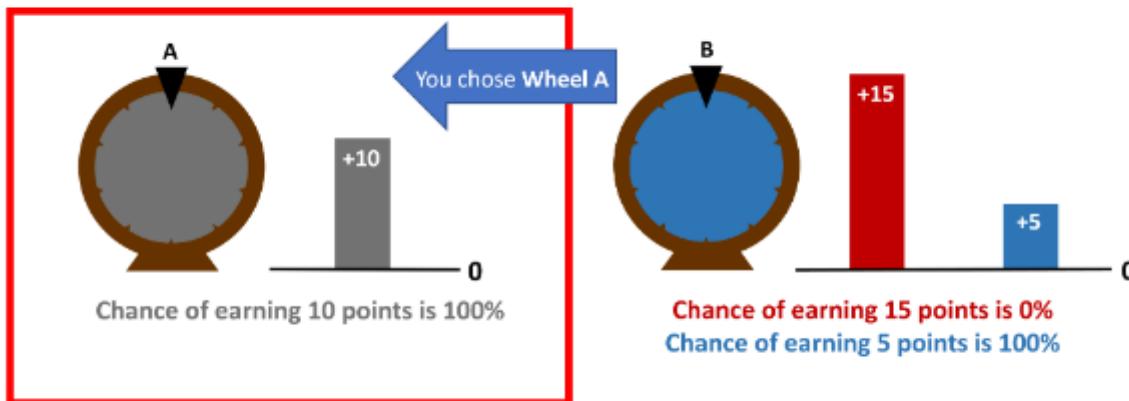

Chance of earning 15 points is 0%
Chance of earning 5 points is 100%

Select Wheel B

Practice round 1 out of 2

Please choose Wheel A or Wheel B.

You chose Wheel A.

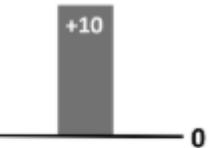

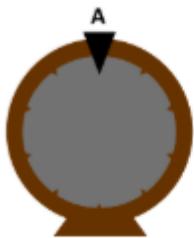

In this scenario, **Wheel A** is better as **Wheel A** contains only GREY segments, giving you **10 points**.

Since all the segments on **Wheel B** are **blue**, you will only receive **5 points** if you choose Wheel B.

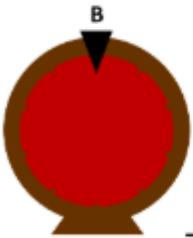

Practice round 2 out of 2

Please choose Wheel A or Wheel B.

Chance of earning 10 points is 100%

Select Wheel A

Chance of earning 15 points is 100%

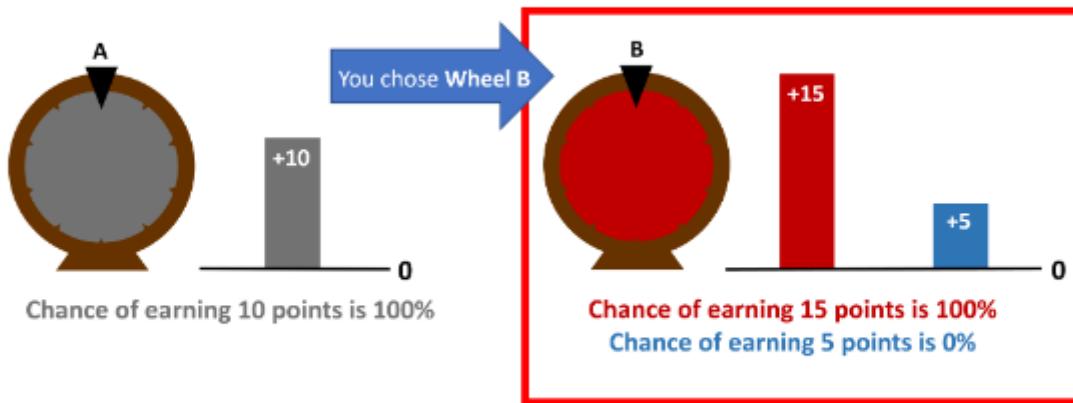

Chance of earning 5 points is 0%

Select Wheel B

Practice round 2 out of 2

Please choose Wheel A or Wheel B.

You chose Wheel B.

In this scenario, **Wheel B** is better as **Wheel B** contains only RED segments, giving you **15 points**.

Since all the segments on **Wheel A** are **grey**, you will only receive **10 points** if you choose Wheel A.

This is the end of the practice rounds.

Next, you will begin playing the formal rounds.

You are encouraged to complete the formal rounds without taking a break.

Please press the next button (→) to start on the formal rounds.

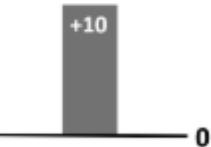

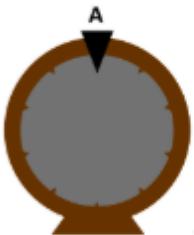

Please complete the following 9 rounds of Game 3. Your points will be shown on the next page.

Game 4 Instructions

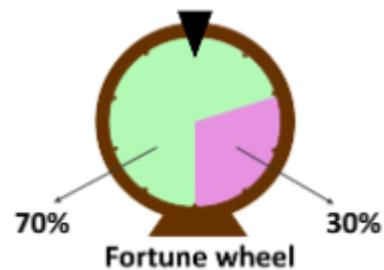

In this game, you'll be randomly paired with some other players that will play in the role of "Player B".

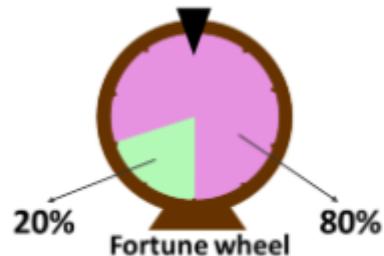

You are going to play several rounds of the game. In each round, you will be choosing between two options: A and B. If you select Option A, you get 10 points [+10] and Player B gets 10 points [+10].

If you select Option B, a fortune wheel will be used to determine your outcomes. The wheel has green and pink sections. The sizes of the two sections will be different for each round. In the following example, the proportion of the green section is 70% and the proportion of the pink section is 30%.

In another round, the proportions of the green and pink sections can be 20% and 80%, respectively.

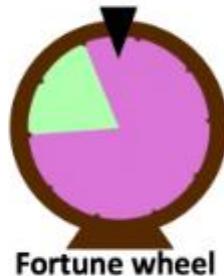

The fortune wheel will be spun. Please press the next button (→) to see how it spins.

Here is how the fortune wheel will spin:

As it is random, you do not know when the spinning will stop.

Please press the next button (→) to proceed.

If the black triangle pointer lands on the green section,

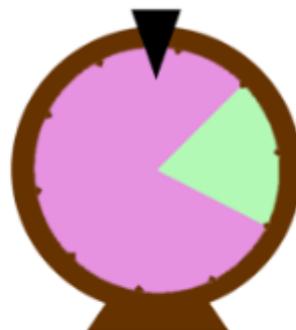

Fortune wheel

Outcome (1) will be realised. You will get 15 points [+15]; Player B will also get 15 points [+15].

If the black triangle pointer lands on the pink section,

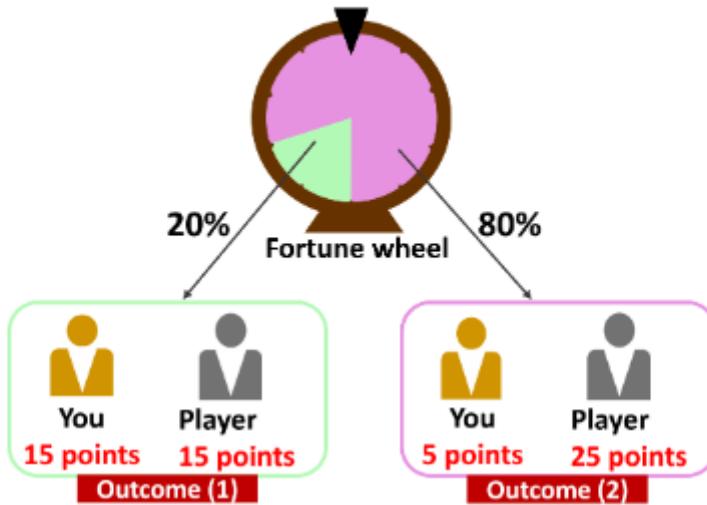

Fortune wheel

Outcome (2) will be realised. You will get 5 points [+5]; Player B will get 25 points [+25].

In this game, Option B will be shown as this:

The proportion of the green section of the wheel represents the probability that **Outcome (1)** will be realised.

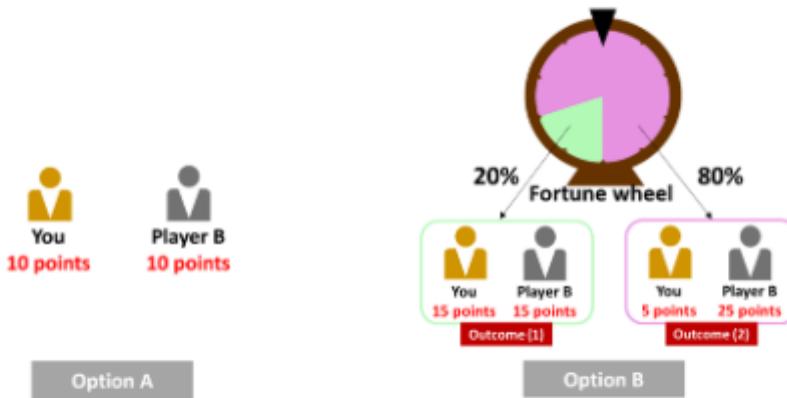

The proportion of the pink section represents the probability that **Outcome (2)** will be realised.

In the above example,

- 2 out of 10 times, the pointer will land on the green section and **Outcome (1)** will be realised.
- 8 out of 10 times, the pointer will land on the pink section and **Outcome (2)** will be realised.

This is an example of one round of the game.

Your task is to choose between Option A and B.

The proportion of green and pink sections of the fortune wheel will change. Pay attention!

Please note that:

- You have two choices:
 - Option A
 - Option B
- Your decision will produce points for both yourself and Player B.
- Player B will not make any choices.

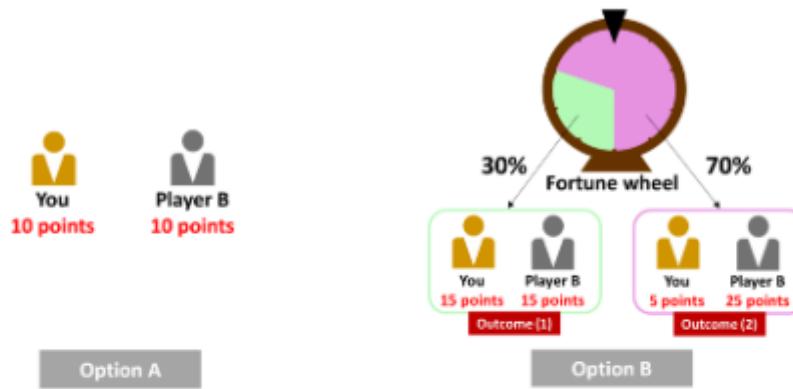

Let's make sure you understand the rules.

If you are ready to start the game, click on the next button (→) to begin the quizzes and practice round.

Quiz 1 out of 3

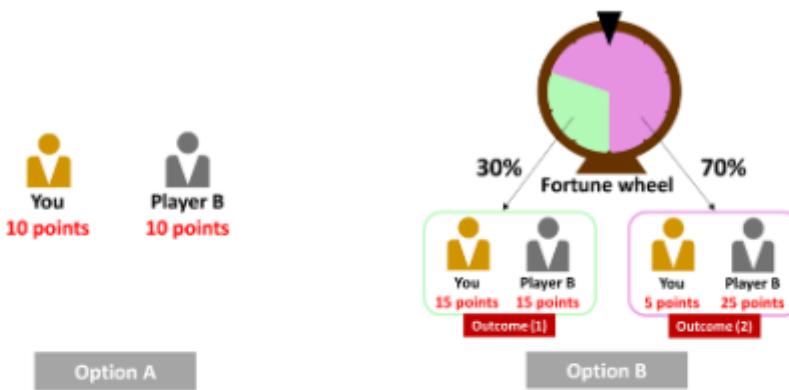

If you choose **Option B** and the pointer lands on the **Green** section, how many points will you and Player B each get?

		Points

You chose Option A.

Round 3 out of 9

You chose Option A.

Round 4 out of 9

You chose Option A.

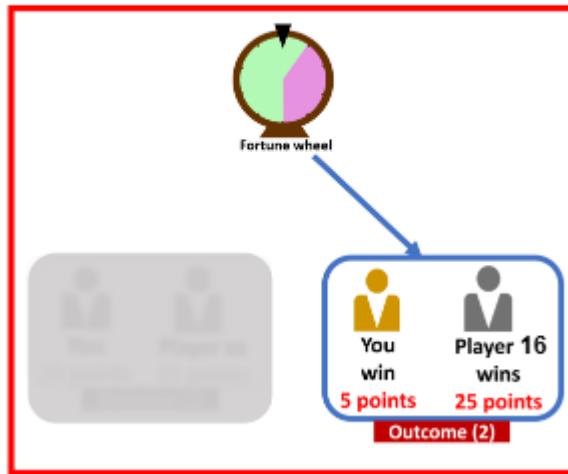

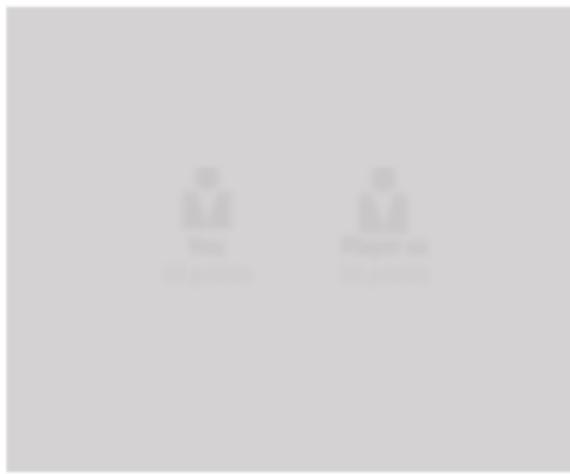

Round 5 out of 9

You chose Option A.

Round 6 out of 9

You chose Option B, and the fortune wheel indicated that Outcome (2) would be realised.

Round 7 out of 9

You chose Option B, and the fortune wheel indicated that Outcome (1) would be realised.

Round 8 out of 9

You chose Option B, and the fortune wheel indicated that Outcome (1) would be realised.

Round 9 out of 9

You chose Option B, and the fortune wheel indicated that Outcome (1) would be realised.

Next, you will play Game 5. Please click on the next button (→) to begin Game 5.

Game 5 Instructions

As in the previous game, you'll be randomly paired with some other players that will play in the role of "Player B".

You are going to play several rounds of the game. In each round, you will be choosing between two options: A and B. If you select Option A, you get 10 points [+10] and Player B gets 10 points [+10].

If you select Option B, **Player B** will choose between two outcomes:

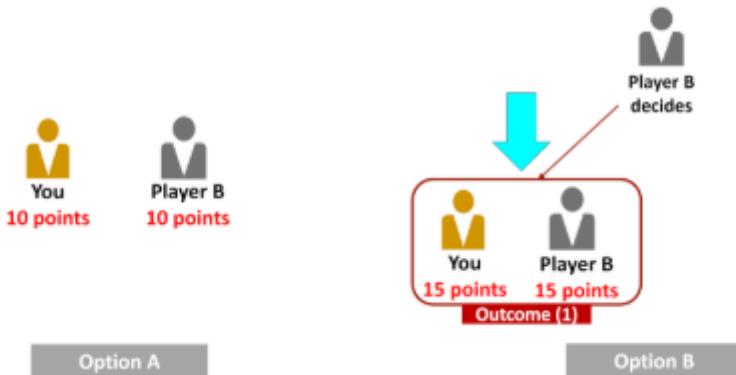

Option A

Option B

If you select Option B, **Player B** will choose between two outcomes:

If Player B chooses Outcome (1): You get 15 points [+15]; Player B gets 15 points [+15].

If you select Option B, **Player B** will choose between two outcomes:

If Player B chooses Outcome (1): You get 15 points [+15]; Player B gets 15 points [+15].

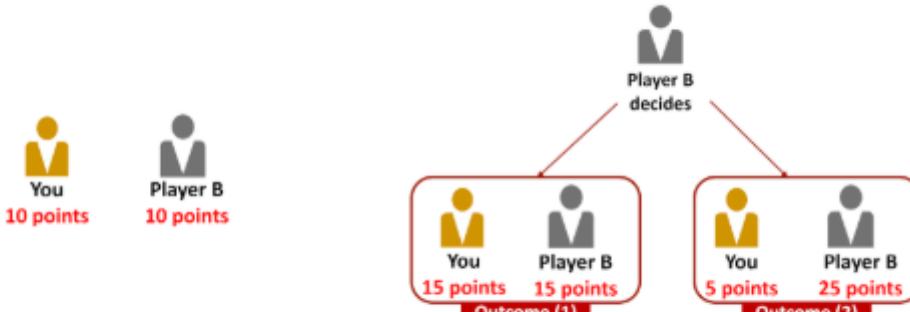

If Player B chooses Outcome (2): You get 5 points [+5]; Player B gets 25 points [+25].

If you select **Option B**, Player B will choose between two outcomes:

If Player B chooses Outcome (1): You get 15 points [+15]; Player B gets 15 points [+15].

If Player B chooses Outcome (2): You get 5 points [+5]; Player B gets 25 points [+25].

Option A

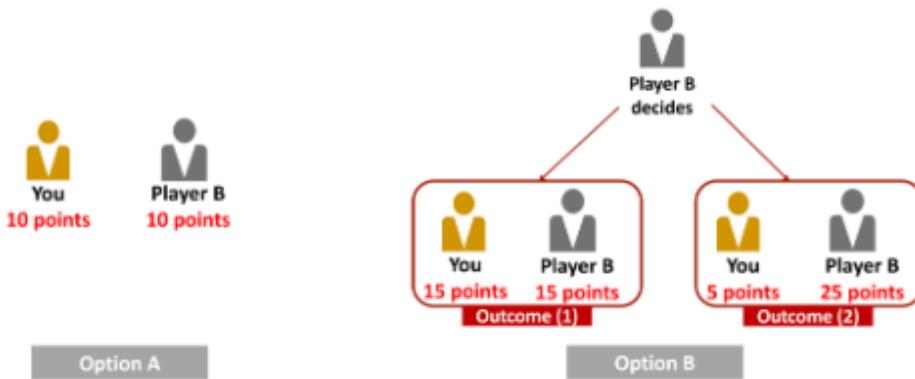

Option B

Be careful! This is different from the previous game, in which a fortune wheel was used
to determine your outcomes.

You will also not know what Player B will decide.

This is an example of one round of the game.

Your task is to choose between Option A and B.

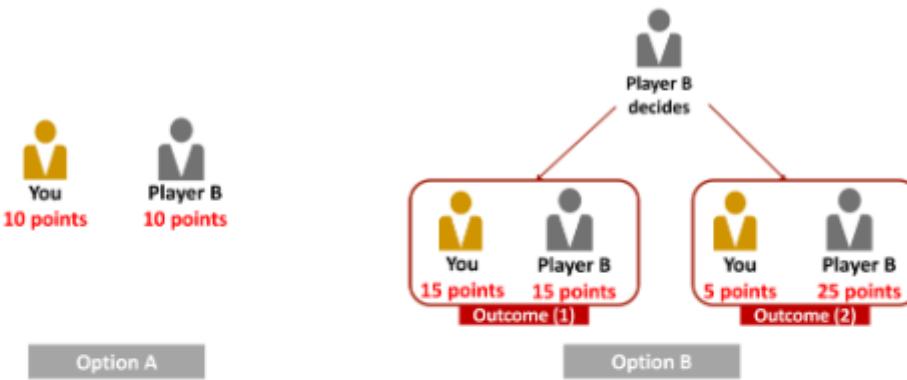

Let's make sure you understand the rules.

If you are ready to start the game, click on the next button (→) to begin the quizzes and practice round.

Quiz 1 out of 3

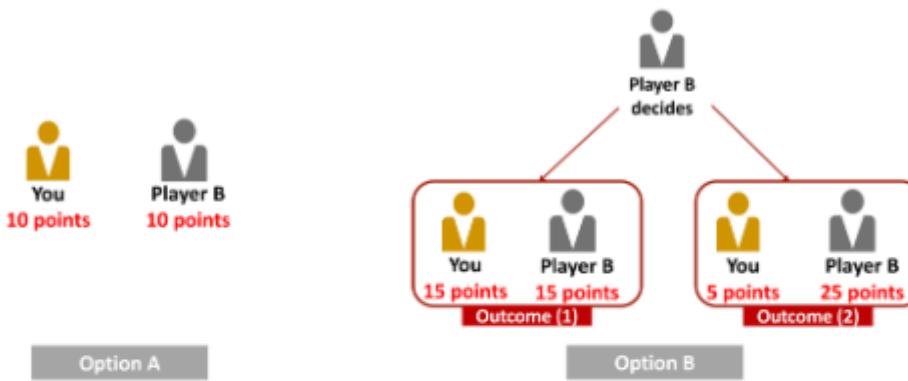

If you choose **Option A**,
how many points will you and Player B get?

		Points			
		10	5	25	15
You	10	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	5	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Player B		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Quiz 1 out of 3

If you choose **Option A**,
how many points will you and Player B get?

		Points			
		10	5	25	15
You	10	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	5	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Player B		<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

Correct Answer:

Option A

Option B

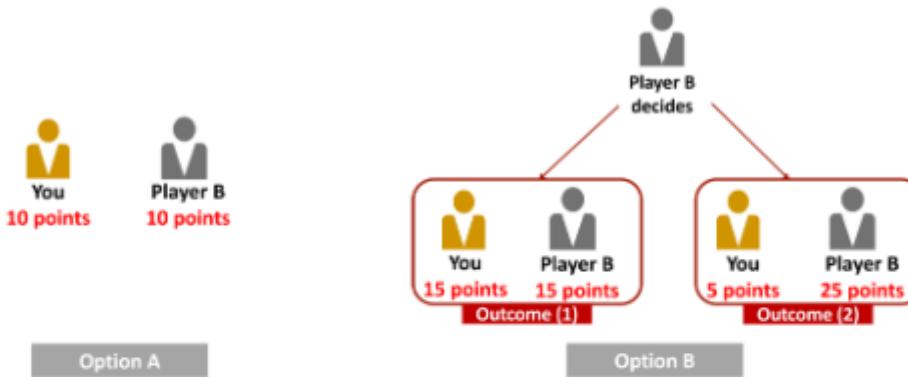

If you choose **Option A**,

you get 10 points [+10] and Player B gets 10 points [+10].

		Points			
		10	5	25	15
You	10	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	5	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
Player B		<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Quiz 2 out of 3

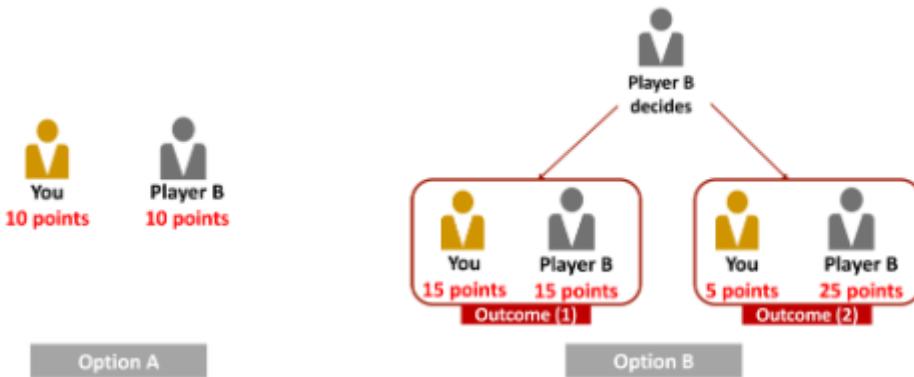

If you choose **Option B** and Player B chooses **Outcome (1)**,
how many points will you and Player B get?

		Points			
		10	5	25	15
You	10	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	5	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Player B		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Quiz 2 out of 3

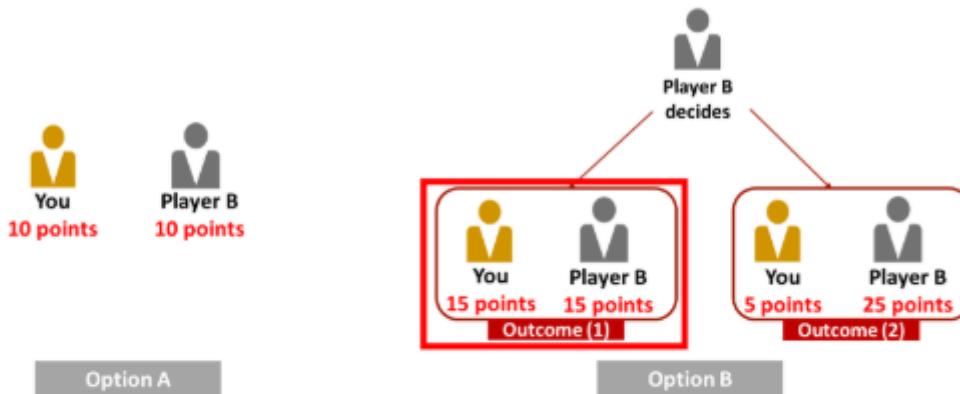

If you choose **Option B** and Player B chooses **Outcome (1)**,
how many points will you and Player B get?

		Points			
		10	5	25	15
You	10	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
	5	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Player B		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

Correct Answer:

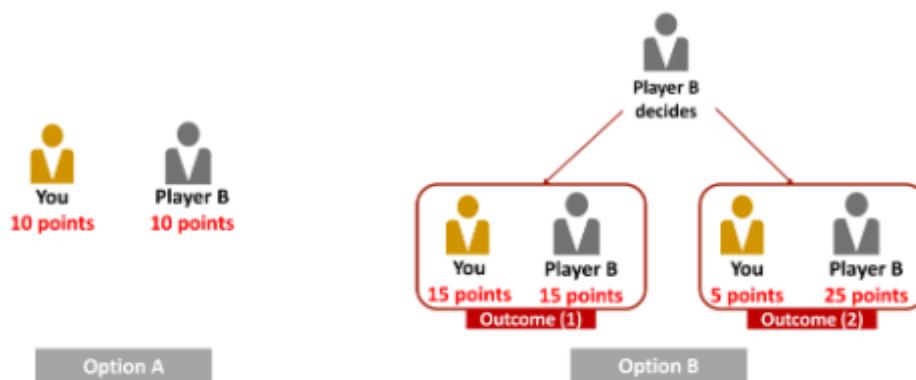

If you choose **Option B** and Player B chooses **Outcome (1)**,
you get 15 points [+15] and Player B gets 15 points [+15].

		Points			
		10	5	25	15
You	10	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
	5	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
Player B		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

Quiz 3 out of 3

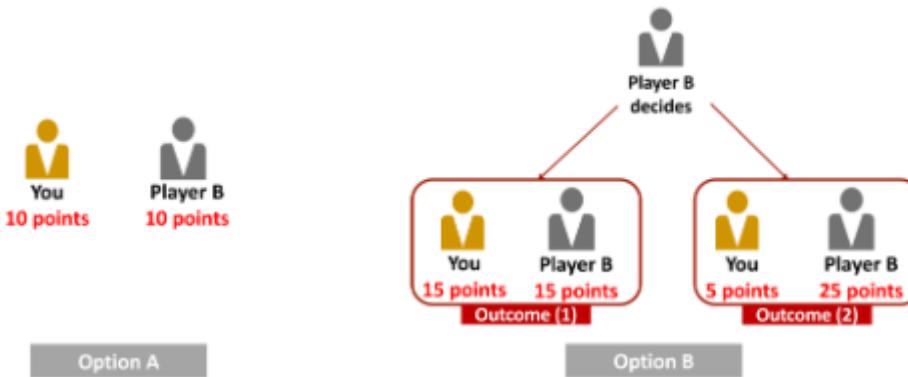

If you choose **Option B** and Player B chooses **Outcome (2)**,
how many points will you and Player B get?

		Points			
		10	5	25	15
You	10	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	5	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Player B		<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Quiz 3 out of 3

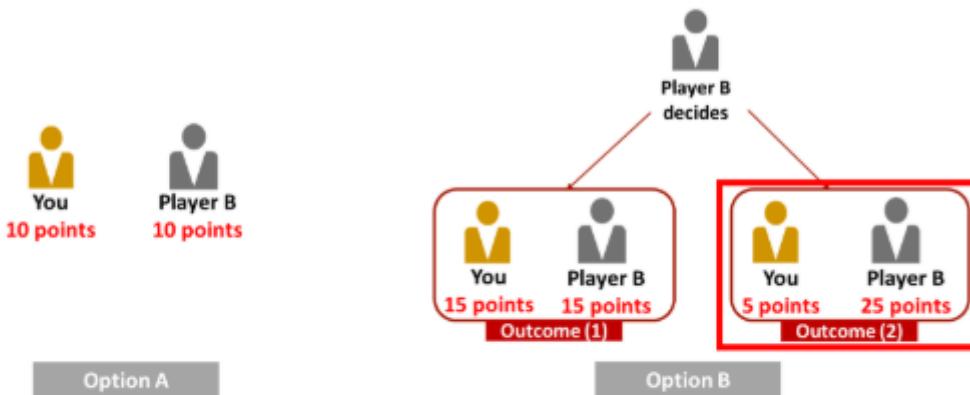

If you choose **Option B** and Player B chooses **Outcome (2)**,
how many points will you and Player B get?

		Points			
		10	5	25	15
You	10	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
	5	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
Player B		<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>

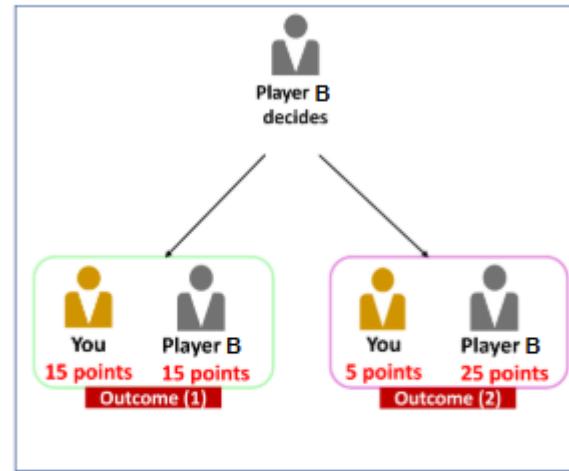

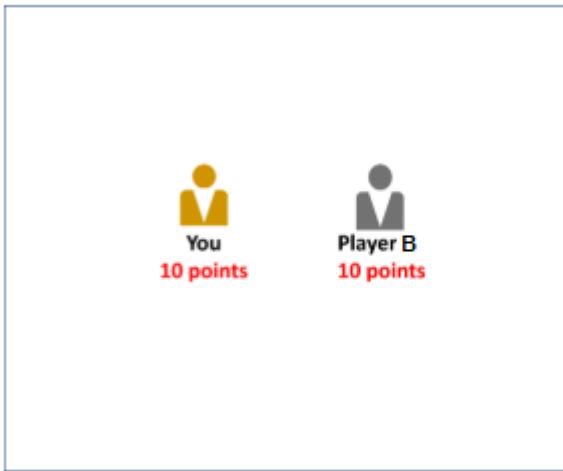

Correct Answer:

If you choose **Option B** and Player B chooses **Outcome (2)**,
you get 5 points [+5] and Player B gets 25 points [+25].

This is a practice round. Please make a choice between Option A and Option B.

After making a choice, please click on the next button (→) to view your points.

This is a practice round. Please make a choice between Option A and Option B.

Game 6 Instructions

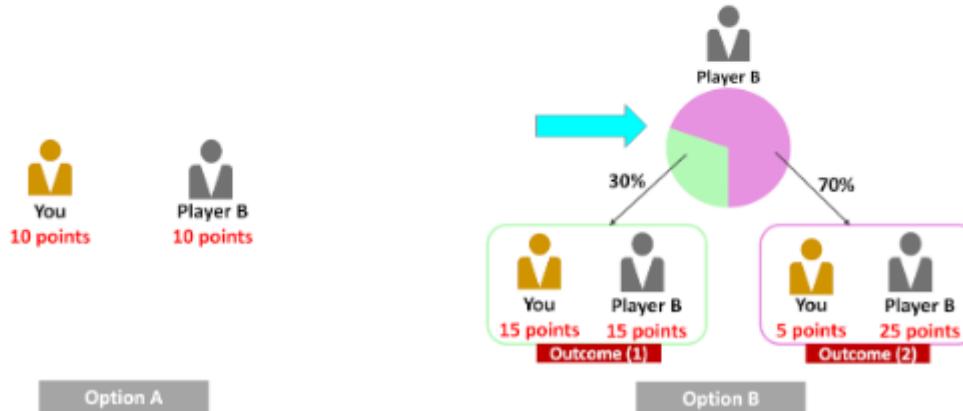

This is the same game as before...

This is the same game as before, but now you have some information about Player B!

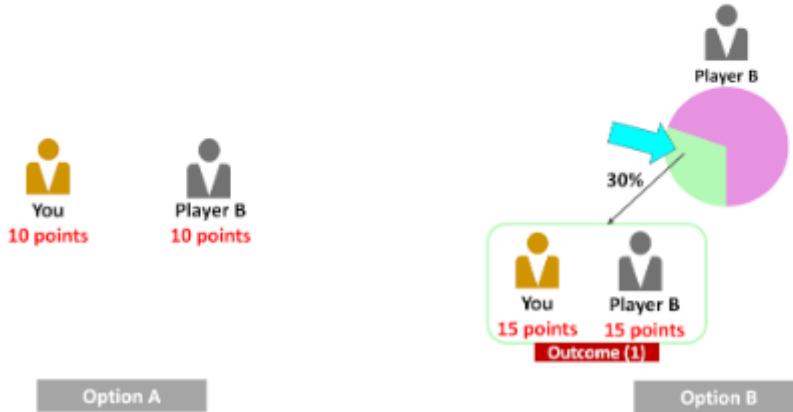

This is the same game as before, but now you have some information about Player B!
Player B is selected from a group of players whose choice history can be represented by the pie below.
You can simply assume that the pie is a history of Player B's previous choices.

This is the same game as before, but now you have some information about Player B! Player B is selected from a group of players whose choice history can be represented by the pie below.

You can simply assume that the pie is a history of Player B's previous choices.

The proportion of the **green** section represents the frequency Player B chose **Outcome (1)** in the past. For instance, 30% means Player B chose **Outcome (1)** in **3 out of 10 times in the past**.

This is the same game as before, but now you have some information about Player B! Player B is selected from a group of players whose choice history can be represented by the pie below.

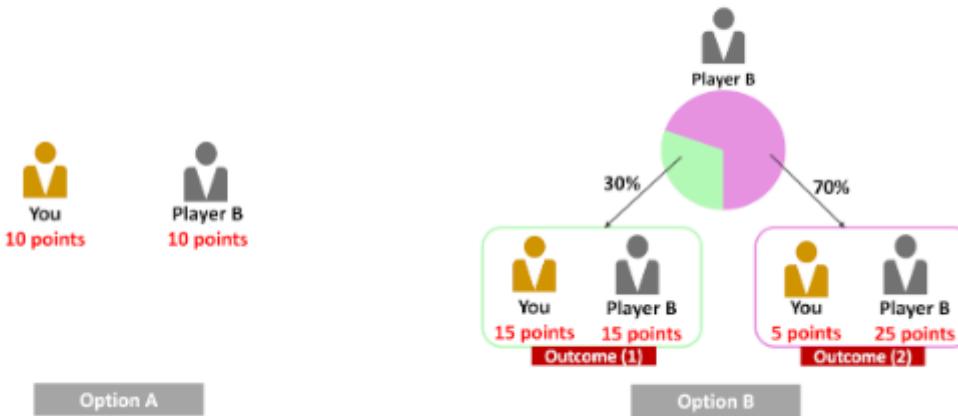

You can simply assume that the pie is a history of Player B's previous choices.

The proportion of the **pink section** represents the frequency Player B chose **Outcome (2)** in the past. For instance, 70% means Player B chose **Outcome (2)** in **7 out of 10 times in the past**.

This is an example of one round of the game.

Again you have to choose between Option A and Option B. However, if you choose option B, Player B will decide between Outcome (1) and Outcome (2).

Your task is to choose between Option A and B.

Please note that:

- You have two choices:
 - Option A
 - Option B
- Your decision will produce points for both yourself and Player B.

Let's make sure you understand the rules.

If you are ready to start the game, click on the next button (→) to begin the quizzes and practice round.

Game 8 Instructions

In this game, you'll be randomly paired with some other players that will play in the role of "Player B".

You

Player B

In each round, you will be asked to allocate 10 points between you and Player B.

You

Player B

10 points

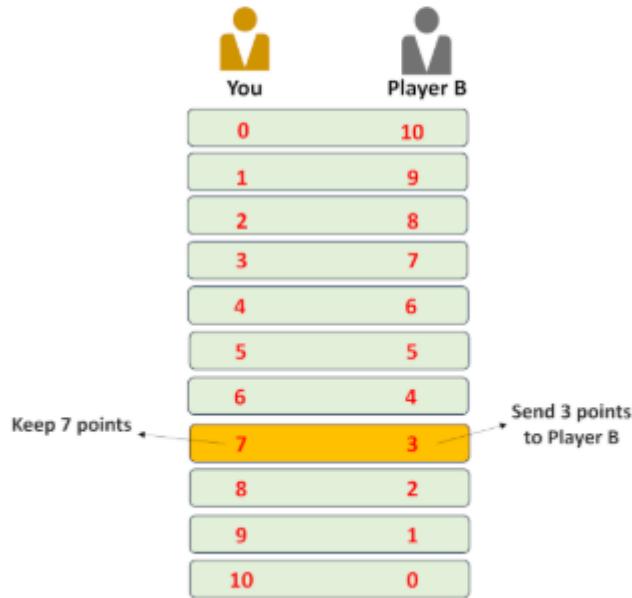

You have the following options:

 You	 Player B
0	10
1	9
2	8
3	7
4	6
5	5
6	4
7	3
8	2
9	1
10	0

You can choose to send any points between 0 and all 10 points to Player B.

However, Player B is free to accept or reject your allocations:
If they accept your offer, both of you will receive the points that you proposed.
For example, if you kept 7 points and sent 3 points to Player B,

However, Player B is free to accept or reject your allocations:

If they accept your offer, both of you will receive the points that you proposed.

For example, if you kept 7 points and sent 3 points to Player B, and Player B chooses to accept, you will receive 7 points and Player B will receive 3 points in this round.

If Player B rejects your offer, both of you will receive nothing! Therefore, you will receive 0 points and Player B will receive 0 points in this round.

Player B also knows these rules.

Player B has been told:

- If they accept, your proposed allocation will be realised.
- If they reject, both of you will get nothing.

Please note that:

- You will play several rounds with different participants. In each round, you will allocate 10 points between yourself and another participant (Player B).
- Player B will see your allocation and decide whether to accept or reject it.
- If Player B accepts the allocation, your proposed allocation will be realized.
- If Player B rejects the allocation, both you and Player B will receive nothing.
- Both you and Player B know these rules.
- Your responses are anonymous. You will never know or meet the person you play with; similarly, the person you play with will never meet you or know who you are.
- **Player B is not currently online, so you will not see their choices during this game.** Your responses will be sent to Player B later, and their decisions will affect your bonus payment.
- You have **one minute** to complete each round.

Let's make sure you understand the rules.

If you are ready to start the game, click on the next button (→) to begin the practice round.

This is a practice round.

Game 7 Instructions

In this game, you'll be randomly paired with some other players that will play in the role of "Player B".

You

Player B

In each round, Player B will be asked to allocate 10 points between you and Player B.

You

Player B

10 points

Player B has the following options:

 You	 Player B
0	10
1	9
2	8
3	7
4	6
5	5
6	4
7	3
8	2
9	1
10	0

They can choose to keep all the 10 points and send you 0 points;
they can also choose to send you all the 10 points and keep nothing.

How to allocate the points is totally at Player B's will.

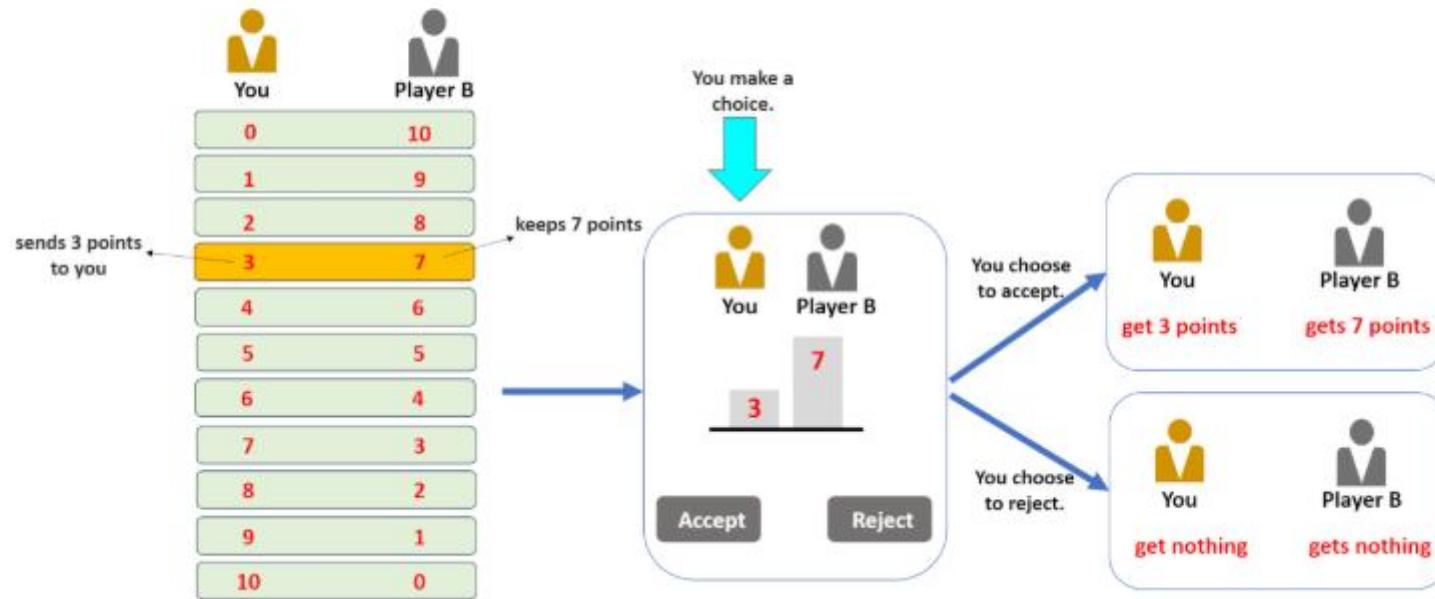

However, you can also choose to accept or reject Player B's allocations:
If you accept their offer, both of you will receive the points that they proposed.
For example, if Player B kept 7 points and sent 3 points to you,

However, you can also choose to accept or reject Player B's allocations:
If you accept their offer, both of you will receive the points that they proposed.
For example, if Player B kept 7 points and sent 3 points to you,
and you choose to **accept**, you will receive 3 and Player B will receive 7 in this round.

If you **reject** the offer, **both of you will receive nothing!** Therefore, you will receive 0 points and Player B will receive 0 points in this round.

Player B also knows these rules.

Please note that:

- You will play several rounds with different participants (Player B). In each round, Player B will allocate 10 points between you and themselves.
- You will see their allocation and decide whether to accept or reject it.
- If you accepts the allocation, Player B's proposed allocation will be realised.
- If you reject the allocation, both you and Player B will receive nothing.
- Both you and Player B know these rules.
- Your responses are anonymous. You will never know or meet the person you play with; similarly, the person you play with will never meet you or know who you are.

Let's make sure you understand the rules.

If you are ready to start the game, click on the next button (→) to begin the practice round.

This is a practice round.

Now you are playing with a new player.

Player B proposed the following allocation. Please choose to accept or reject.

Accept

Reject

Game 8 Instructions

In this game, you will make a series of choices to spin Wheel A or Wheel B.

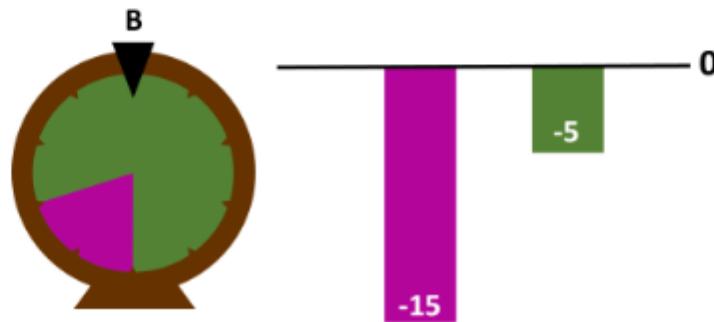

Each wheel has 10 equal segments. The black triangle pointer will randomly land on one of the segments. Segments of different colours are worth different points.

Wheel A contains only orange segments. Choosing to spin this wheel always results in a loss of 10 points.

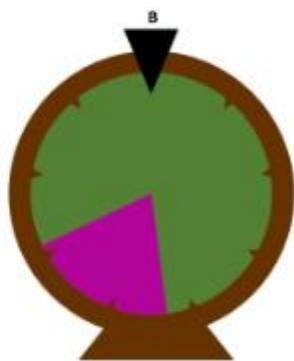

Wheel B contains a mix of purple and green segments (it could also be all purple or all green).

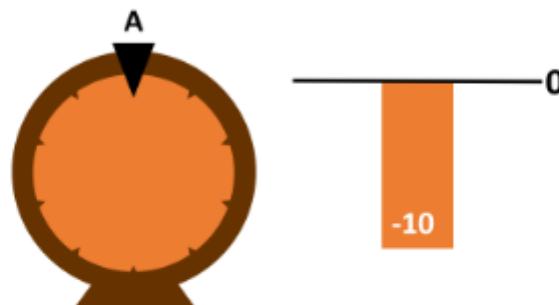

The pointer landing on a purple segment results in a loss of 15 points while the pointer landing on a green segment results in a loss of 5 points.

After a wheel is chosen, it will be spun, and the pointer will randomly land on one of the segments.

If you choose Wheel A, your chance of losing 10 points is 100%.

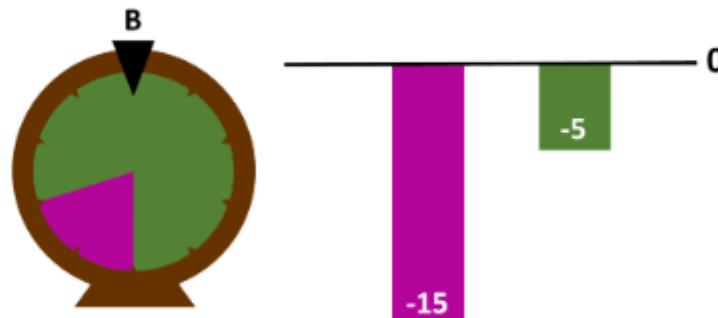

Chance of losing 10 points is 100%

If you choose Wheel B, you could lose more or fewer than 10 points, as it depends on where the pointer lands.

In this example, Wheel B has **2 purple segments** and **8 green segments**.

Thus, if you choose Wheel B, there is a:

- 20% (2/10) chance of losing 15 points (pointer landing on a purple segment), and
- 80% (8/10) chance of losing 5 points (pointer landing on a green segment)

Chance of losing 15 points is 20%

Chance of losing 5 points is 80%

Note that the ratio of green and purple segments **changes** in each round.

Please note that:

- You can choose to spin either Wheel A or Wheel B.
- Each wheel has 10 equal segments.
- Wheel A contains only orange segments while Wheel B contains green and purple segments (but could also only consist of all green or purple segments).
- Once you choose a wheel, it will be spun, and where the pointer lands determines how many points you lose.
- The pointer is equally likely to land on any segment.
- The pointer landing on an orange segment results in a loss of 10 points, a purple segment in a loss of 15 points, and a green segment in a loss of 5 points.

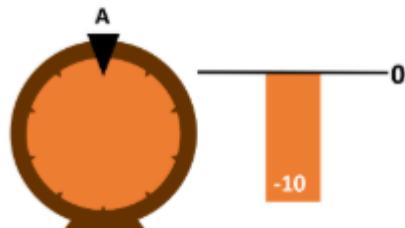

Let's make sure you understand the rules.

If you are ready to start the game, click on the next button (→) to begin the practice rounds.

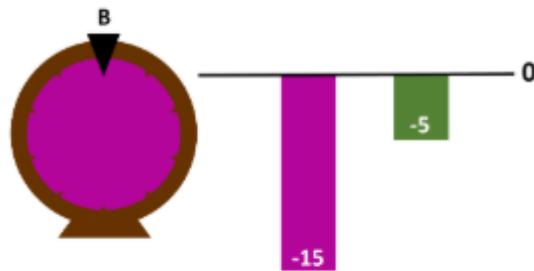

Practice round 1 out of 2

Please choose Wheel A or Wheel B.

Chance of losing 10 points is 100%

Select Wheel A

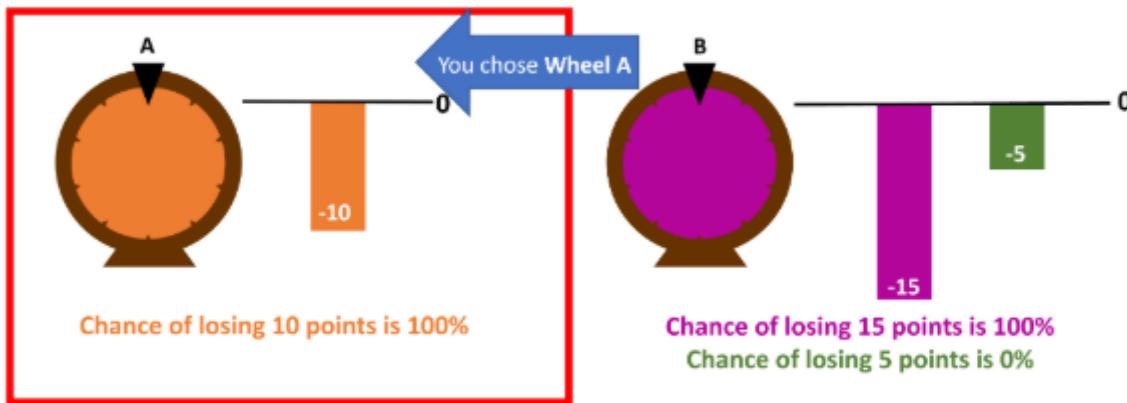

Chance of losing 15 points is 100%

Chance of losing 5 points is 0%

Select Wheel B

Practice round 1 out of 2

Please choose Wheel A or Wheel B.

You chose Wheel A.

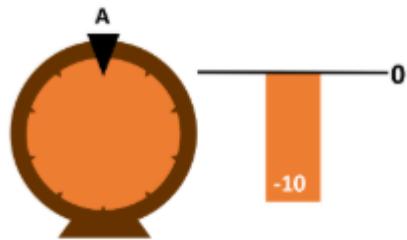

In this scenario, **Wheel A** is better as **Wheel A** contains only ORANGE segments, therefore, you only lose **10 points** [-10].

Since all the segments on **Wheel B** are **purple**, you will lose **15 points** if you choose Wheel B.

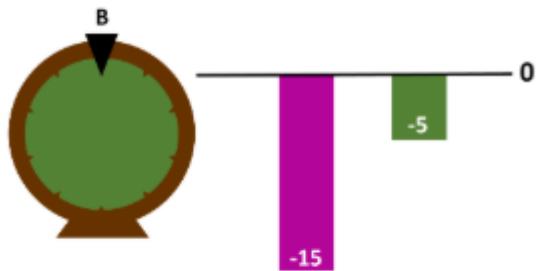

Practice round 2 out of 2

Please choose Wheel A or Wheel B.

Chance of losing 10 points is 100%

Select Wheel A

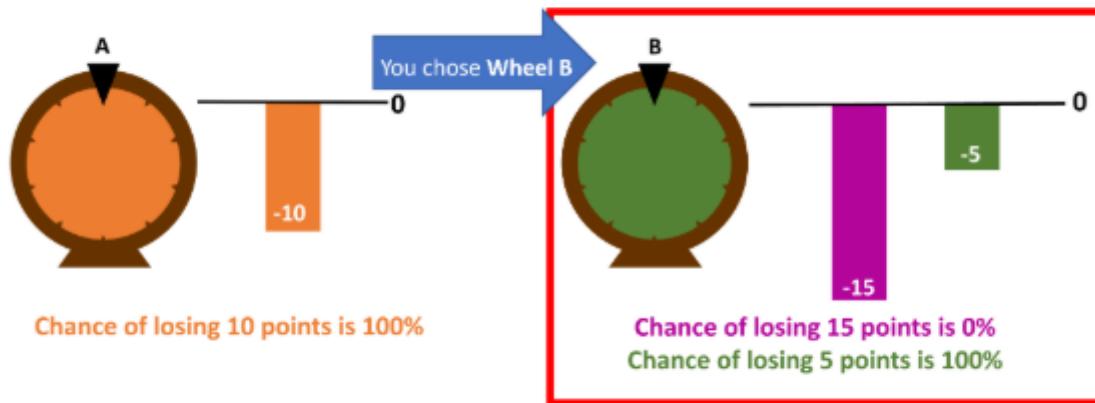

Chance of losing 15 points is 0%
Chance of losing 5 points is 100%

Select Wheel B

Practice round 2 out of 2

Please choose Wheel A or Wheel B.

You chose Wheel B.

In this scenario, Wheel B is better as **Wheel B** contains only GREEN segments, therefore, you only **lose 5 points [-5]**.

Since all the segments in **Wheel A** are **orange**, you will **lose 10 points** if you choose Wheel A.

This is the end of the practice rounds.

Next, you will begin playing the formal rounds.

You are encouraged to complete the formal rounds without taking a break.

Please press the next button (→) to start on the formal rounds.

Your outcome is

— 0
-5

A horizontal number line with a green square at the zero point. The number '-5' is written below the line to the left of the zero, and the number '0' is written to the right of the zero.

Please click on the next button (→) to begin Game 9.

Game 9 Instructions

In this game, you will make a series of choices between two rewards:

- One reward will be available today.
- The other reward will be available after a 30-day wait.

For example, you might need to choose between **10 points today** or **20 points in 30 days**.

If you choose **10 points today**, the points will be converted to cash and paid to you **immediately after you finish the study**.

If you choose **20 points in 30 days**, the cash payment will be made **about 30 days later**.

Please note:

- Only a subset of choices will be randomly selected and you will be paid according your choice as mentioned above.
- There are no correct or wrong answers. Your decisions are entirely up to you.

10 points today

37 points in 30 days

15) I prefer:

10 points today

39 points in 30 days

In some of the games you just finished, you played with other players (referred to as Player B).

While making your decisions in these games, how much did you consider the possible impact on Player B's earnings?

I did not think about it

I briefly thought about it

I sometimes thought about it

I often thought about it

I always considered it

You have completed the games. Next, you will answer another set of short questionnaires about your demographics, personality, attitudes, and behaviors.
